

Focus and Philosophy

Centre i focus and philosophy Our focus is simple. Centre i was set up to develop resilient, agile, resourceful and influential leaders, teams and organisations. Our underlying philosophy is captured by our descriptor line: inspire – innovate – influence We have learnt the value of resourcefulness rather than resources. We understand how to develop creativity and the ability to problem solve under the most demanding and exacting circumstances. We excel in creating critical and creative thinkers who are able to positively challenge the conventional and who in turn are able to operate in the world’s most challenging environments and gain the advantage no matter what.
