

Diversity

What we do | History | Focus and Philosophy | Diversity | Responsibility | The Director We take diversity very seriously at Centre i. This is not some lame paper policy, we seek out diversity...not from the usual perspective of equality and political correctness but from the knowledge that diversity of thought and ideas brings about advantage. Every member of our community actively looks to be challenged and have their thinking and skills pushed to the limit. As we work with a wide diversity of clients around the world, on every continent it's what gives us our advantage. Our breadth enables us to connect with and work alongside fellow humans from all walks of life and in all situations. No matter what your situation is Centre i can talk your language.
